

ENTERPRISE RESOURCE PLANNING (ERP)

WHY ERP?

Every business strives to perform and operate as a well-oiled machine without any glitches or bumps. If we look at all the conglomerates and the corporate giants that work in this manner, a small peek into the mechanics behind this smooth operation is no other than an effective and efficient ERP solution. But for an ERP solution to be effective it needs to be a good fit for the company's needs.

Whoever started it, though, the ERP market is much more diverse now. One of the issues to tackle, it seems, is that, up until recently, it was only large enterprises that could afford to implement ERP systems. To remedy the situation, vendors have since come out with cost-effective ERP solutions targeted at the mid-market. This means that smaller businesses really can get all the functionality that was once the preserve of larger enterprises Custom ERP that will connect the previously disconnected system to a single platform. Complete back office automation by connecting their day to day operations.

WHY SALES TRACKER?

Our mission is to make technology an asset for the business and not a problem. Too many times we have seen IT consulting firms recommend solutions that are not appropriate for the specific client's business or will not take a business' operations into their planning as they routinely bring down an entire business. We work around your business. We strive to make technology integrate seamlessly with your business so that your business can grow. F5 ERP automates business processes and help companies run the business more efficiently and to gain greater insight to their business activities with lasting benefits.

F5 ERP software is industry focused, as it has tailor made solutions which caters Manufacturing, Trading, Service, Retail, and HRM. It understands the inherent need to connect the varied and diverse departments in an organization. But we don't stop at just connecting. We offer a wide array of essential functionalities that seamlessly integrate each and every department of your business by presenting a real-time view of your data and processes. Through F5 ERP, we further ensure that all department workflows are streamlined to enable better decision making and data handling in more controlled and efficient manner. Simply put, F5 ERP provides your company a significant operational backbone by seamlessly managing your Purchase, Sales, Inventory, Fixed Assets, HRM, Payroll and Finance.
